

Intruder Alarms.

The Yale Intruder Alarm alerts you when your alarm is triggered, and allows you to disarm your alarm with a simple tap of your contactless tag.

The 200m extended range enables you to protect outbuildings as well as your home, with enhanced encrypted security for the ultimate peace of mind.

Contactless Control

Using the Yale Contactless Tag, you can now disarm your alarm with a simple tap of your tag on the control panel.

Easy to Fit

Components are wire free and easy to install.

Phone Call Alerts

Receive phone alerts when your alarm is triggered.

No Monthly Fee

No hidden costs or contracts.

Part Arming

System can be part armed when you are in the property.

Extended Wireless Range

Ideal for protecting all sizes of home, this 200m long reach range is ideal for protecting your shed, garage and home within one system, without the need for a signal booster.

Enhanced Encrypted Security

A DIY alarm system with professional features. The Intruder Alarm range has bi-directional encrypted wireless technology and will notify you in the event a device is tampered with.
